Dear Colleagues,

I am delighted to invite you to the 28th Advanced Course in Proctology and Pelvic Floor Disorder from 10 to 13 February 2025 in Geneva.

I will host this edition with a renown local and international faculty. A it is the only Swiss course on this topic and one of the very few in Europe, it is an occasion not to miss.

As you know, proctological diseases are the most frequent after dental diseases. This 4-day course will be combining face to face discussion, delayed live surgeries and lectures. The program will be interactive with case studies, demos, presentations of techniques, discussions, difficult case presentations, debriefs and self-report evaluation. This year, our course will be recognized by the European society of coloproctology (ESCP), the Swiss surgical association and the Swiss gastroenterology association.

Organized by the Geneva University Hospitals Coloproctology team, it is hosted by the SWISS Foundation for Innovation and Training in Surgery (SFITS), a multidisciplinary training and research platform designed to simulate almost real conditions and provide a secured environment to professionals working in OR.

At the end of the course, every participant will receive a certificate.

On behalf of our team and our partners, we look forward to welcoming you in Geneva.

Professor Frédéric Ris
